

In The Jungle

The Natural World

In the jungle, lots of trees live
Grass and flowers growing up tall

Monkeys climb

Snakes slide by

Crocodiles with open mouths

This is a very expressive song, so use gestures and actions to help create the atmosphere of being surrounded by trees, grass, flowers and animals.

Explore and enjoy the vocal sounds - the “roarr” of the tiger, the “ssss” of the snake etc.

Children can use hand puppets and take solos for their different animals

Instrumental sounds can be explored to add to and enhance the vocal sounds produced to represent each animal.

A drum can be added for the “snap” each time of the crocodile’s mouth, developing skill in listening and timing when using percussion
